

Implement Client Script & UI Policy (Incident)

Milestone 6: Testing the Configuration

Activity 1: Test Mandatory Enforcement

Description

1. **Navigate to Incident:**

Go to Incident → Create New to open a new Incident form.

2. **Set the Impact Field:**

Select **High** for the **Impact** field. This will trigger the UI Policy and Client Script behaviors you configured earlier.

3. **Leave Assigned To Empty:**

Do not fill in the **Assigned To** field. This will test the onSubmit Client Script that prevents saving if Assigned To is missing.

4. **Click Submit:**

Attempt to save the Incident record.

5. **Verify the Result:**

- The Incident should **not be saved** because Assigned To is required when Impact is High.
- An **error message** should appear, indicating that the Assigned To field cannot be empty.
- Confirm that all UI Policy actions, such as read-only fields or automated urgency updates, are working as expected.

The screenshot shows the 'Incident - Create INC0010013' form. The form is divided into two main sections. The left section contains fields for 'Number' (INC0010013), 'Caller' (Abel Tutor), 'Category' (Inquiry / Help), 'Subcategory' (-- None --), 'Service', 'Service offering', 'Configuration item', 'Short description', and 'Description'. The right section contains fields for 'Channel' (-- None --), 'State' (New), 'Impact' (1 - High), 'Urgency' (3 - Low), 'Priority' (3 - Moderate), 'Assignment group' (CAB Approval), and 'Assigned to'. The form also includes a 'Submit' button and a 'Resolve' button.

Activity 2: Test Successful Save

Description

1. Fill the Assigned To Field:

Open the Incident form and select a user in the **Assigned To** field. This ensures the onSubmit Client Script condition is satisfied.

2. Click Submit:

Attempt to save the Incident record.

3. Verify the Result:

- The Incident should be **saved successfully** without any errors.
- Confirm that all other configured behaviors, such as:
 - **Urgency auto-setting** (from the onChange Client Script)
 - **Read-only fields** (from the UI Policy Action)
 - **State restrictions** (from the onCellEdit Client Script) are functioning as expected

The screenshot shows the ServiceNow Incident form for incident INC0010015. The form is divided into two main sections: a left column for basic incident details and a right column for status and assignment. The left column includes fields for Number (INC0010015), Caller (Abel Tuter), Category (Inquiry / Help), Subcategory (-- None --), Service, Service offering, Configuration item, Short description (Test Incident for Client), and Description. The right column includes Channel (-- None --), State (In Progress), Impact (2 - Medium), Urgency (1 - High), Priority (2 - High), Assignment group, and Assigned to (Beth Anglin). The Urgency field is highlighted with a green border, indicating it is the focus of the test. The form also includes a 'Related Search Results' section at the bottom.

Activity 3: Reverse Condition Test

Description

1. Open an Existing Incident:

Go to Incident → Open and select an Incident where **Impact** is currently set to **High**.

2. Change Impact:

Update the **Impact** field from **High** to **Medium**. This will test the

Reverse if false functionality of your UI Policy and the behavior of your Client Scripts.

3. Verify the Field Behavior:

- **Assigned To** should no longer be mandatory.
- **Urgency** should now be editable, meaning the read-only UI Policy action is reversed.

4. Save the Record:

Click **Submit** to save the changes. The record should save successfully without errors, confirming that the reverse condition works as intended.

The screenshot shows the ServiceNow 'Incident - Create INC0010012' form. The form is divided into two main sections: 'Incident' and 'New record'. The 'Incident' section contains fields for Number (INC0010012), Caller (Adela Cervantsz), Category (Inquiry / Help), Subcategory (-- None --), Service, Service offering, Configuration item, Short description (testing UI policy), and Description. The 'New record' section contains fields for Channel (-- None --), State (New), Impact (2 - Medium), Urgency (1 - High), Priority (2 - High), Assignment group, and Assigned to. A red asterisk (*) is next to the 'Short description' field, indicating a required field. A red circle with the number 5 is next to the 'Short description' field. The form is titled 'Incident - Create INC0010012' and has a 'Submit' button. The bottom of the form shows a 'Related Search Results' section with a search bar and a dropdown menu for 'Knowledge & Catalog (All)'.

Activity 4: Test List Edit Blocking

Description

1. Navigate to the Incident List:

Go to Incident → All to view all Incident records in a list view.

2. Attempt a List Edit:

- Locate any Incident in the list.
- Double-click the State field to try editing it directly from the list.

3. Verify the Behavior:

- An alert message should appear, indicating that direct changes to the State field are not allowed.
- The State value should remain unchanged, confirming that the onCellEdit Client Script is working correctly.

Activity 5: Test Form-Based Update

Description

1. Open the Incident Record:

Navigate to the same Incident record you used in previous tests.

2. Change the State:

On the Incident form, update the State field to a new value.
This tests that changes via the form (not the list) are allowed.

3. Click Update:

Save the record by clicking Update.

4. Verify the Result:

- The State change should be saved successfully.
- Confirm that other fields, such as Assigned To and Urgency, still follow the configured UI Policy and Client Script rules.

The screenshot displays the ServiceNow 'Incident - Create INC0010014' form. The form is titled 'Incident New record' and includes a search bar and navigation links (All, Favorites, History, Admin). The form fields are organized into two columns. The left column contains: Number (INC0010014), * Caller (System Administrator), Category (Inquiry / Help), Subcategory (-- None --), Service, Service offering, Configuration item, * Short description, and Description. The right column contains: Channel (-- None --), State (In Progress), Impact (3 - Low), Urgency (3 - Low), Priority (5 - Planning), * Assignment group, and Assigned to. The 'State' field is highlighted with a green border. At the bottom, there is a 'Related Search Results' section with a search bar and a dropdown menu for 'Knowledge & Catalog (All)'.
